ABOUT ME

I'm a MERN stack developer specializing in dynamic web applications, with a focus on optimizing back-end performance, scaling MongoDB databases, and exploring advanced React patterns and GraphQL integration. Experienced in full-stack development, API creation, and best practices in the MERN stack, with a keen interest in optimizing JavaScript code for performance. Open to collaborating on open-source projects and innovative web development initiatives.

WORK EXPERIENCE

[06/09/2023 – 06/12/2023]

Internships

HELLO WORLD TECHNOLOGIES

City: Rahim Yar Khan | **Country:** Pakistan

I successfully developed advanced e-learning, social media, and e-commerce platforms. As a full-stack developer, I managed both the frontend and backend, delivering a seamless and engaging user experience. My work involved designing interactive course interfaces, implementing robust user management systems, and integrating dynamic features to enhance learning and social interactions. This project showcased my ability to create effective, user-friendly educational environments.

[01/12/2023 – Current]

Freelancer

City: Rahim Yar Khan | **Country:** Pakistan

As a freelance MERN stack developer, I specialize in building dynamic, full-stack web applications using MongoDB, Express.js, React.js, and Node.js. My core responsibilities include designing scalable backend architectures, developing interactive user interfaces, integrating RESTful APIs, and optimizing application performance. I work closely with clients to understand their project needs, manage end-to-end development, and ensure timely delivery of high-quality solutions. My expertise extends to database management, API creation, and implementing best practices for clean, maintainable code

EDUCATION AND TRAINING
